

Akshay S. Lagad

Senior Software Engineer | Senior JavaScript developer | React/Next.js & NodeJS Specialist
[+91-9665378342](tel:+91-9665378342) | akshaylagad.work@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-oriented Sr. Software Developer with 5.1+ years of experience delivering responsive, secure, and user-centric applications. Strong background in JavaScript, TypeScript, React, Next.js and REST API integration. Passionate about clean UI design, performance tuning, and building seamless cross-platform experiences.

SKILLS

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), Macro-Frontend, TypeScript, React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, SCSS, Axios, RTK Query

Backend / Database: Node.js, Express.js, MongoDB, RESTful APIs.

Version Control & CI/CD: Git, GitHub, Jenkins, GitHub Actions

Testing / Debugging: Jest, Postman, Browser Stack, Swagger, Chrome DevTools

Design Tools: VS Code, Visual Studio 2022, Figma, Zeplin

EXPERIENCE

Software Engineer | NeoSOFT Technologies, Pune | Dec 2025 – Present

- Built scalable React.js/Next.js applications using Micro-frontend Architecture and Module Federation.
- Developed PWAs with offline support, push notifications, and API-driven dynamic UIs.
- Led performance optimization, debugging, code reviews, and mentored junior developers.
- Collaborated with clients and cross-functional teams to deliver business-critical solutions.

Senior Software Engineer | Aloha Technology Pvt. Ltd., Pune | Sep 2022 – Nov 2025

- Developed high-performance React.js/Next.js applications and reusable component libraries.
- Built scalable, API-driven user interfaces for enterprise and customer-facing applications.
- Improved application performance, responsiveness, and cross-platform compatibility.
- Worked closely with clients, stakeholders, and development teams in Agile environments.

Web Developer | Primal Infosys Pvt. Ltd. | Jun 2021 – Sep 2022

- Developed responsive web applications using HTML, CSS, Bootstrap, JavaScript, and React.js.
- Migrated legacy websites to React.js and integrated REST APIs.
- Implemented form validations, state management, and frontend performance improvements.
- Supported frontend-backend integration using Node.js and Express.js.

PROJECTS (Major Only)

Visa Booking Platform

- Developed a visa administration portal from scratch using micro-frontend architecture with TypeScript, React.js, Vite, and Redux Toolkit (RTK Query).
- Built and maintained core modules such as Country Master, Visa Master, and Document Master to manage visa-related data and document verification processes.
- Developed Visa Rules and Flow Manager modules to configure and automate visa application workflows based on country-specific requirements.
- Implemented Order Management features to support the end-to-end visa application lifecycle, from submission to processing and status tracking.
- Created reusable UI components, custom hooks, and shared utilities to ensure consistency, scalability, and maintainability across micro-frontend applications.
- Collaborated with cross-functional teams to integrate APIs, optimize application performance, and deliver a seamless user experience.

ERP System (Internal Organizational Platform)

- Developed responsive and scalable ERP interfaces for business modules such as HR, inventory, procurement, and operations management.
- Built reusable UI components and API-driven screens to streamline data management and improve application maintainability.
- Implemented dynamic dashboards, forms, tables, filtering, and reporting features to enhance user productivity and workflow efficiency.
- Integrated REST APIs and managed application state to ensure seamless data flow and real-time user interactions.
- Optimized frontend performance through code refactoring, lazy loading, and responsive design best practices.
- Collaborated with cross-functional teams to gather requirements, resolve UI issues, and deliver high-quality features in an Agile environment.

E-Commerce Platform

- Developed a scalable e-commerce web application enabling users to browse, search, and purchase products through seamless shopping workflows.
- Built responsive and user-friendly interfaces using React.js for product listing, cart management, checkout, and order tracking.
- Integrated REST APIs for product catalogue, authentication, user management, orders, and payment processing.
- Developed admin dashboards for product, inventory, offer, and order management to support business operations.
- Implemented form validations, error handling, and role-based access controls to enhance security and user experience.
- Optimized application performance and ensured responsive behaviour across desktop and mobile devices.

EDUCATION

Pune University Aug 2018 – May 2021 *B.E - Computer Engineering Pune, Maharashtra*
